SELF-STUDY WITH ELEARNING

eLearning Made Easy

Helping you achieve success in your education and career goals is our top priority. At Arcitura, we understand that everyone has different requirements and preferences when it comes to self-study.

All Arcitura courses are available for self-study via eLearning.

Upon purchasing a course, you receive access via an online interactive eLearning platform.

To provide you with the greatest flexibility, you will be offered the option of also accessing the course materials via two additional eLearning formats.

The additional eLearning formats are provided to you upon request and at no extra cost.

arcitura.com/elearning

eLearning Formats

For Everyday Learning

An online interactive eLearning platform with individual lessons, as well as interactive and automatically graded exercises and practice questions.

For Learning On-the-Go

A study kit platform with access to full course documents that support online/offline synching, annotations, comments and custom bookmarks.

For Your Reference

A set of printable PDF documents that you can keep (for all course workbooks and posters).

Each Arcitura eLearning course includes a self-test to help you assess your readiness to take a certification exam. Separate Exam Prep Kits are also available with additional online interactive practice questions that are automatically graded.

INSTRUCTOR-LED TRAINING & COACHING

Arcitura works closely with its network of authorized training partners to provide online and onsite instructor-led training workshops to organizations throughout the world, including many corporations, federal government agencies and numerous Fortune 500 organizations.

Arcitura and its partners have Certified Trainers and supporting staff that are highly experienced in the planning, delivery and management of private and public training events that can be tailored to your learning objectives and scheduling preferences.

arcitura.com/training

Instructor-Led Services

Online Training

Training workshops for Arcitura courses can be delivered by Certified Trainers online via virtual classrooms.

Onsite Training

Training workshops for Arcitura courses can be delivered by Certified Trainers onsite at your location or at an external venue.

Online Coaching

Certified Trainers are available to provide virtual coaching services that can be scheduled on an hourly basis.

For Groups & Individuals

Workshops for Groups or Individuals

Training workshops can be delivered for small and large groups. Online training workshops can also be arranged for individuals.

Coaching for Groups or Individuals

Virtual coaching sessions can be arranged for groups and individuals to provide supplementary guidance and to assist with exam preparation.

Training Programs for Multiple Groups

Larger training programs involving multiple groups can be managed and coordinated and further supplemented with ongoing reporting.

HOW TO GET STARTED

The AI Architecture & Design course covers fundamental and advanced AI systems and technology architecture topics, including design principles, distributed AI computing and scalability and reliability infrastructure, decision-making logic, performance optimization, security and enterprise architecture integration.

The course is comprised of a set of modules. Each module has a set of lessons and is further supplemented with exercises to help reinforce your understanding of key topics.

Upon completing the course you can obtain a digital certificate of completion, as well as a digital training badge from Acclaim/Credly, with an account that supports the online verification of your course completion status.

Additional resources are available to assist you with completing this course, including downloadable digital course files, printed course materials, coaching hours and instructor-led training services.

The AI Architecture & Design course can be used to prepare for the AI Architecture Certification exam, as explained on the following page.

For more course details, including individual course module topic outlines, visit the [Course & Certification webpage](https://arcitura.com/courses) via arcitura.com/courses.

HOW TO GET CERTIFIED

The AI Architecture & Design course prepares you for the official AI Architect Certification exam.

Upon attaining a passing grade on the certification exam you will receive an official digital accreditation certificate and a digital certification badge from Acclaim/Credly, with an account that supports the online verification of your certification status.

Additional resources are available to assist you with preparing for the certification exam, including practice exam questions, downloadable digital course files, printed course materials, coaching hours and instructor-led training services.

To learn more about the AI Architect certification bundle that includes the course, exam and practice questions at a discount, visit the [Course & Certification webpage](#) via arcitura.com/store.

AI ARCHITECTURE & DESIGN COURSE

The AI Architecture & Design course covers fundamental and advanced AI systems and technology architecture topics, including design principles, distributed AI computing and scalability and reliability infrastructure, decision-making logic, performance optimization, security and enterprise architecture integration.

The AI Architecture & Design course is comprised of 5 course modules. Each has an estimated completion time of 10 hours. Shown here are the contents of each course module, followed by the individual course module outlines.

MODULE 01: Fundamental Predictive AI

- Workbook Lessons (100+ pages)
- Interactive Exercises
- Mind Map Poster
- Symbol Legend Poster
- Practice Exam Questions
- PDFs of Workbook and Posters (printable)

MODULE 04: Fundamental Generative AI

- Workbook Lessons (100+ pages)
- Interactive Exercises
- Mind Map Poster
- Symbol Legend Poster
- Supplement
- Practice Exam Questions
- PDFs of Workbook and Posters (printable)

MODULE 13: Fundamental AI Architecture & Design

- Workbook Lessons (100+ pages)
- Interactive Exercises
- Mind Map Poster
- Core Monitors and Modules Poster
- Symbol Legend Poster
- Practice Exam Questions
- PDFs of Workbook and Poster (printable)

MODULE 14:

Advanced AI
Architecture & Design

- Workbook Lessons (100+ pages)
- Interactive Exercises
- Mind Map Poster
- Practice Exam Questions
- PDFs of Workbook and Posters (printable)

MODULE 15:

AI Architecture &
Design Lab

- Lab Exercise Booklet
- Mind Map Poster
- Practice Exam Questions
- PDFs of Workbook and Poster (printable)

/ Partial Course Available

For those of you that have already completed some of the modules in this course (most likely because they were also part of a different course you completed), a partial version of this course is available. Visit the [Partial Courses & Certification Bundles webpage](#) for more information about partial courses.

Fundamental Predictive AI

This course module illustrates how predictive AI can be used and applied in a range of business applications, as well as essential coverage of predictive AI practices and systems. The module explores the most common learning approaches and functional areas that AI systems are used for. All of the content is authored in easy-to-understand, plain English.

The following primary topics are covered:

- Predictive AI Business and Technology Drivers
- Predictive AI Benefits
- Common Risks and Challenges of Using Predictive AI
- Business Problem Categories Addressed by AI
- Types of Predictive AI
- Common Predictive AI Learning Approaches
- Understanding Predictive AI Learning and Model Training
- Step-by-Step Training Loop Process
- Supervised Learning, Unsupervised Learning, Continuous Learning
- Heuristic Learning, Semi-Supervised Learning, Reinforcement Learning
- Common Predictive AI Functional Designs, Computer Vision, Pattern Recognition
- Robotics, Natural Language Processing (NLP)
- Speech Recognition, Natural Language Understanding (NLU)
- Understanding AI Models and Neural Networks

Fundamental Generative AI

//////

This course module explores the application of generative AI within a range of business scenarios and provides fundamental coverage of generative AI concepts, models, best practices and neural networks, including Generative Adversarial Networks (GANs), Variational Encoders (VAEs) and Transformer models. All of the content is authored in easy-to-understand, plain English.

The following primary topics are covered:

- Generative AI Business and Technology Drivers
- Generative AI Benefits
- Common Risks and Challenges of Using Generative AI
- Business Problem Categories Addressed by Generative AI
- Understanding Models, Algorithms and Neural Networks
- Types of Generative AI
- Training Generative Models and Understanding the Training Loop
- Understanding Generative Adversarial Networks (GANs)
- Understanding Variational Encoders (VAE)
- Understanding Transformers
- Steps to Building AI Systems
- Generative AI Best Practices

Fundamental AI Architecture & Design

This course module provides an essential understanding of AI system and solution architecture. It explains the different AI system architecture types, scopes and modes and provides detailed coverage of core AI system modules (including data ingestion, data preprocessing, feature engineering, inference engine and model repository) and monitors (including operations, data, model and ancillary monitors).

The following primary topics are covered:

- AI Architecture vs. AI Engineering Comparison
- AI Product Architectures vs. Custom AI Architectures
- AI Architecture Scopes (System and Solution)
- AI Solution Operational Modes (Training and Production)
- AI System Architecture Types (Monolithic, Modular, Hybrid)
- AI Solution Data Storage (Internal, External, Hybrid)
- AI System Core Modules
- Data Ingestion for Common Predictive AI and Generative AI Data Sources
- Data Preprocessing in Predictive AI and Generative AI Systems
- Feature Engineering in Predictive AI and Generative AI Systems
- Inference Engine in Predictive AI and Generative AI Systems
- Model Repository in Predictive AI and Generative AI Systems
- Operations Monitors (Performance, Resource)
- Data Monitors (Input, Output)
- Model Monitors (Weight and Gradient, Activation Distribution, Bias and Fairness)
- Ancillary Monitors (Explainability, Robustness and Adversarial Attack, Data Quality, Data Labeling)

Advanced AI Architecture & Design

//////

This course explores a range of techniques and complex topics dedicated to AI system design and technology architecture, including scalability models, performance and optimization techniques and resiliency architectures.

The following primary topics are covered:

- AI System Scalability Patterns
- Distributed Data Processing and Data Caching
- Data Partitioning and Sharding
- Incremental Processing
- Hardware Acceleration
- Autoscaling and Load Balancing
- Continuous Learning
- AI System Performance Patterns
- Parallelism and Concurrency
- Edge Caching and Vectorization
- Data Compression
- Lazy Loading
- AI System Resiliency Patterns
- Fault Tolerance
- Graceful Degradation
- Chaos Engineering

AI Architecture & Design Lab

This course module provides a series of case-study driven, lab-style exercises and problems that are designed to test your ability to apply your knowledge of topics covered in previous modules. Completing this lab helps reinforce understanding of preceding topics and further demonstrates how different practices and technologies can be applied together as part of greater solutions.

The following exercises are provided:

- Reading Exercise 15.1: Case Study Background: IVA
- Lab Exercise 15.2: Model Training for Realtime Predictions
- Lab Exercise 15.3: Realtime Computations & Resource Exhaustion
- Lab Exercise 15.4: System Scalability & Model Accuracy
- Lab Exercise 15.5: Reliable Content Generation & System Errors
- Reading Exercise 15.6: Case Study Background: HealthV
- Lab Exercise 15.7: LLM Training for Personalized Content Generation
- Lab Exercise 15.8: Content Delivery Optimization & Remote Access
- Lab Exercise 15.9: Data Volume & Resource Constraints
- Lab Exercise 15.10: Realtime Monitoring & Fluctuating Workloads

COMPLETE & PARTIAL EXAMS

To attain the AI Architect Certification requires a passing grade on the complete AI Architect Certification Exam or a passing grade on the partial AI Architect Certification Exam and the attainment of the AI Professional Certification, as explained below.

Complete Exam Details

The complete AI Architect certification exam covers topics from all 5 modules in the AI Architect certification track. Purchase this exam if you've taken the AI Architecture & Design course and would like to pursue certification as an AI Architect, or if you would like to retake this exam to improve your grade.

Because this complete exam encompasses course modules from two certifications, upon passing the exam you will receive official digital certificates and digital certification badges for both the AI Professional and AI Architect accreditations. If you've already achieved the AI Professional certification, then you do not need to take this complete exam. Instead, you can take the partial AI Architect exam.

Partial Exam Details

The partial AI Architect certification exam covers topics from Modules 13, 14 and 15 in the AI Architect certification track.

Purchase this exam if:

- you've taken the complete or partial AI Architecture & Design course and
- you would like to pursue certification as an AI Architect and
- you've already achieved the AI Professional certification.

If you are already a certified AI Professional and you pass this exam, you will receive an official digital certificate and a digital certification badge for the AI Architect accreditation.

ABOUT THE ARCITURA CURRICULUM

The Arcitura headquarters in Vancouver, Canada from 2012 until the COVID-19 pandemic. Since then, Arcitura staff collaborate remotely, geographically distributed over three continents.

Courses and Modules

➤ Arcitura's curriculum is comprised of over 50 courses and over 120 course modules.

➤ Every Arcitura course is comprised of multiple course modules.

➤ Each course corresponds to a professional certification.

For each course, a separate Official Guide PDF is available for download on the course description page.

arcitura.com/courses

arcitura.com/tracks

Programs, Tracks and Certifications

Arcitura's library of courses and modules is organized into the following programs:

AI & Cloud AI
Professional
Academy

Digital
Transformation
Professional
Academy

Next-Gen IT
Academy

Next-Gen
Data Science
Academy

Cloud
Computing
School

Service
Technology
School

Within each program, modules are organized into tracks. Every course has a track that indicates the order in which course modules should be completed. Each track also corresponds to a professional certification. There are over 50 professional certifications, each of which can be attained by passing a certification exam.

Digital Certificates and Badges

➤ Upon fulfilling the completion requirements for a course via eLearning or an instructor-led workshop, you receive a digital Certificate of Completion and a digital Training Badge from Acclaim/Credly.

➤ Upon attaining a certification, you also receive an official digital Accreditation Certificate and a digital Certification Badge from Acclaim/Credly.

THE ARCITURA DIFFERENCE

Regardless of whether you are an individual looking to boost your career or an organization looking to up-skill a team, Arcitura courses and certifications provide a sound investment.

- Both courses and accreditations are vendor-neutral, which means they empower you with skills and credentials that you can take to wherever you need to go.
- Arcitura is dedicated to excellence in content quality, which is why courses and exams undergo a common development process and are authored by a dedicated team in collaboration with subject matter experts.

arcitura.com/about

What You Learn from Arcitura Courses

Learn from an Extensive Curriculum

Arcitura provides one of the largest and most comprehensive vendor-neutral IT education programs in the world.

Learn about the Latest in IT

Arcitura courses and certifications cover contemporary topics from an IT industry perspective.

Learn about Real World IT

When you take an Arcitura course you learn about a field of practice as it exists in the real world, not specific to any vendor.

What's in an Arcitura Course

Comprehensive Coverage

Each course provides a comprehensive curriculum with 2-8 modules and 20-80 hours of training.

More Than Just Video Lessons

In addition to standard video lessons, courses include full-color workbooks and reference posters for all lessons.

Interactive & Graded Challenges

Courses also include interactive and graded exercises, interactive and graded self-tests and other supplements.
